

JL GENERATORS

Global Suppliers of Generators

J-Power Range

Generating Sets
15-700 kVA

The **J-Power** range of silenced generating sets is ideal for the industrial and construction sectors.

The robust structure and soundproof canopy booth make the **J-Power** range of generators an ideal solution for more demanding applications.

All **J-Power** generators are equipped with Perkins engines, Stamford or Mecc-Alte alternators and Deep Sea Electronics digital control panels.

When using and supplying JL Generators, you can be reassured and confident in the knowledge that our products are built, tried and tested in Europe. Thus, guaranteeing reliability, robustness and, most importantly, strength is always on your side.

What has been achieved to date is a range of world-class products, incorporating superior build quality at the right price, ensuring JL Generators can easily adapt manufacturing and support to the needs of the worldwide Rental Power Generator Market.

The **J-Power** range includes generators from 15kVA to 700kVA. **J-Power** operate at 50Hz or 60Hz, according to the requirements of the destination country.

All generators are water-cooled, 1500/1800 rpm and have a soundproof canopy.

It is the strength and attention to detail that makes the **J-Power** generator range the ideal partner for all those looking for reliable sets with high standards of quality.

Technical Features

- Robust design
- Large side doors give easy access for generator maintenance
- Fork lift pockets
- Central lifting hook for easy handling
- Compact dimensions
- Double wall chassis
- Perkins engine
- Long run fuel tank
- Engine oil draining pump
- Automatic voltage and frequency regulator (AVR)
- Exhaust with spark arrestor
- Deep Sea Electronics digital control panel
- High resistance powder coating paint with heavy duty primer layer
- Strong silenced frame
- Fire resistant soundproof panels
- Engine water heater
- Emergency stop button
- ELCB protection
- Battery isolator
- AMF ready
- 240V battery charger

J-Power generating sets can be equipped with a range of optional accessories to make the generator even more suitable to the needs of the customer.

Optional Accessories

- Distribution panel consisting of either 3 phase or 1 phase socket/s or both
- Site-tow trailer
- 3 way fuel valve (complete with easy, quick access release couplings)
- Automatic starting panel 1
- Automatic starting panel 2
- Heavy duty and robust skid base
- Colour or colours of your choice

1 12 Volt battery isolator switch

2 Robust Hinges and lockable handles

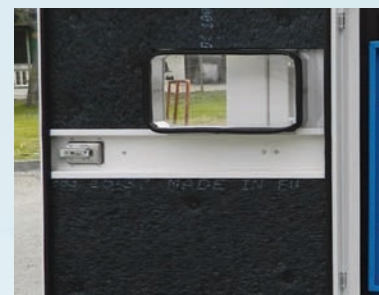

3 Central Lifting Hook

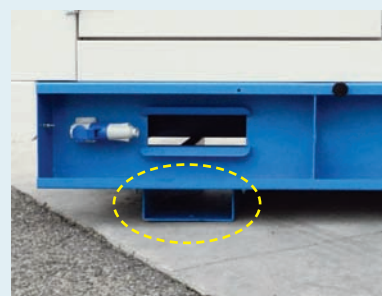

4 Circuit breakers plus ELCB protection

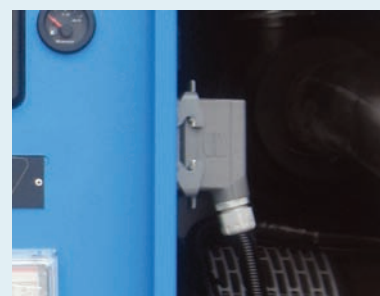

5 Emergency Stop Button

6 Sound proof panels

7 Fork Lift pockets

8 Fast electrical connector

J-Power range 50hZ
